## DESCRIPTION

This project funds the design and construction of a new library (135,700 gross square feet) on the Rockville Campus as outlined in the Rockville Campus Facilities Master Plan, 2002-2012. This new facility will provide 1,000 patron stations in a wide variety of study seating options along with sufficient space to hold the campus' projected collection. This facility will also provide a cafe and patron lounge.

This project will also include underground utility distribution connected to the central plant and site improvements related to this project.

COORDINATION

#### JUSTIFICATION

The current library in Macklin Tower is beyond capacity. The current physically bound volume equivalent (PBVE) is projected to grow approximately 1.5% per year or 15% over ten years. This new facility will address the library needs for study, stack, processing and service spaces, all significantly constrained in their present location. This new facility will also have the capacity to hold the English Department's collection of curriculum materials, avoiding the necessity of library space in the English Department as well as the management of library materials within the department.

### Plans and Studies

Collegewide Facilities Master Plan (1/04).

#### OTHER

Fund Sources: G.O. Bonds and State Aid.

State share of project based on anticipated eligible costs. Relocation costs and design fees above approximately 7% of estimated construction costs may not be eligible for State reimbursement.
